Forsyth County Office of Environmental Assistance and Protection

Paint Stripping and Miscellaneous Surface Coating Operations
Subpart HHHHHH/ 40 CFR 63.11169 - 63.11180

Notification of Compliance

Paint Stripping Operation Using Methylene Chloride

Sources starting up on/or before September 17, 2007 must be in compliance by January 10, 2011 and this Notification of Compliance is due by March 11, 2011.

Sources starting up between September 17, 2007 and January 9, 2008 must be in compliance by January 9, 2008 and this Notification of Compliance is due 180 days after startup.

Sources starting up after January 9, 2008 must be in compliance upon startup and this Notification of Compliance is due 180 days after startup.

Please note that the following sections contain only a summary of the requirements. Please review the complete standard before certifying compliance. It may be viewed at:
<http://www.epa.gov/fedrgstr/EPA-AIR/2008/January/Day-09/a24718.htm>

If this Notice of Compliance is being submitted separate from the Initial Notification, complete and submit Sections 1-4. General Information.

11. a. Management practices
- Evaluated each stripping application to ensure there is a need for paint stripping. (e.g. Is it possible to re-coat without removing the existing coating.)
 - Evaluated each stripping application to ensure there is no alternative paint stripping technology that can be used. (e.g. Non methylene chloride strippers, or mechanical stripping.)
 - Reduce exposure of all methylene chloride strippers to the air.
 - Optimize application conditions to reduce methylene chloride evaporation. (e.g. If heating stripper, making sure temperature is kept as low as possible to reduce evaporation.)
 - Practice proper storage and disposal of methylene chloride strippers. (e.g. Store strippers in closed, air tight containers.)
- b. Is methylene chloride usage at a single stripping operation more than one ton per year?
- No Yes (If "yes", is the following written plan completed?)
 - A written methylene chloride minimization plan is completed that contains the five requirements listed in a. above.
 - The plan is posted at the stripping operation.
- c. Recordkeeping
- Records of annual usage are maintained onsite at all times.
 - The minimization plan, if required, is maintained onsite.

The undersigned certifies that this facility is in compliance with all the applicable requirements of 40 CFR Part 63 and that all information and statements provided in this notice, based on information and belief formed after reasonable inquiry, are true, accurate, and complete.

Signature of responsible company official listed in Section 2 or 4.

Date

Sign this certification and submit this form and other applicable forms to both the Forsyth County OEAP and US EPA.
